Amendment to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

25. (Currently Amended) A method of ablating organic tissue, comprising: sensing an initial state of vibration of the organic tissue prior to ablating the organic tissue:

positioning an electrode adjacent the organic tissue;

supplying electrical power to the electrode to effect ablation of the organic tissue;

sensing with a sensor positioned adjacent the electrode the vibration of the organic tissue being ablated wherein the vibration is self-generated in the organic tissue in response to the ablation and the self-generated vibration occurs during phase-transition but prior to boiling of water in the organic tissue: and

determining a difference in vibration between the initial state of vibration and the selfgenerated vibration; and

reducing power to the electrode when the <u>self-generated</u> vibration reaches a given value.

- (Currently Amended) The method of claim 25, further comprising:
 halting the power when the <u>self-generated</u> vibration reaches a given value.
- (Currently Amended) The method of claim 25, further comprising: supplying fluid from a fluid supply to the tissue; and halting the fluid supply when the <u>self-generated</u> vibration reaches a given value.
- (Original) The method of claim 25 further comprising: sending a signal from the sensor to a switch to reduce the power.
- 29. (Currently Amended) The method of claim 25, further comprising:

Expedited Processing
Application No. 10/792,178
And. Dated: December 7, 2011
Reply to Office Action mailed October 7, 2011

providing output from an output device when the <u>self-generated</u> vibration reaches a given value

- (Original) The method of claim 29 further comprising: sending a signal from the sensor to the output device; and sending an indicator signal from the output device.
- 31. (Original) The method of claim 25 wherein the sensor is a piezoelectric crystal.
- 32. (Original) The method of claim 25 wherein the sensor is a piezoelectric polymer.
- 33. (Previously Presented) The method of claim 25 wherein the sensor is integrated with the electrode.
- 34, -61, (Canceled)
- 62, -80. (Canceled)
